

ABSTRACT

The present invention relates to compounds of the formula I,

5

I

in which R¹, R², R³, R⁴, R⁵, R⁶, A, X, m and n have the meanings indicated
in the claims. The compounds of the formula I are valuable
pharmacologically active compounds. They exhibit a strong antithrombotic
effect and are suitable, for example, for the therapy and prophylaxis of
thromboembolic diseases and restenoses. They are reversible inhibitors of
the blood clotting enzyme factor VIIa and can in general be applied in
conditions in which an undesired activity of factor VIIa is present or for the
cure or prevention of which an inhibition of factor VIIa is intended. The
invention furthermore relates to processes for the preparation of
compounds of the formula I, their use, for example as active ingredients in
pharmaceuticals, and pharmaceutical preparations comprising them.
